

DARCY ROBERTSON
Design Director

ARIDO, IDC, BSID, IIDA, NCIDQ Certified, LEED AP

Darcy Robertson offers a unique perspective on design and construction, a perspective formed by a diverse range of experience in Canada, Japan and Bermuda. His project work includes corporate interiors, retail and institutional planning in addition to design solution for point of purchase (POP) material and “branded” environments.

A creative practitioner, he is equally at ease in any of a broad range of styles, traditional through ultra modern. An expert with the subtleties of colour and finishes along with the impact those choices exert on the effectiveness of the overall environment. He designs for the real world, taking into account the practical realities required for those who will ultimately use the space.

In addition to being creative he is also extremely detail oriented, a crucial combination that provides the ability to coordinate even the most complex build-outs while remaining true to the nuance of the design.

Finally, his consensus-building style makes him both a pleasure to work with and a valuable asset on any project team. He has the ability to effortlessly mesh the often-disparate elements of design and construction to realize focused design objectives. The results speak volumes.

EDUCATION

Sheridan College – Architectural Technology & Design
Japanese Exchange Co-op

EXPERIENCE

Commercial Interiors Group, Bermuda
s.h.y Architecture, Bermuda
